PROFILE

"Senior full-stack developer with 10+ years building enterprise-scale applications across compliance-critical, multi-stakeholder environments. Deep expertise in React/Redux, Node.js, PostgreSQL with Prisma ORM, and REST API design — with proven experience migrating legacy platforms to modern stacks, integrating with shared services (auth, data exchange), and rigorous security/audit practices. Track record of partnering with subject matter experts to translate regulatory requirements (KYC/EDD, FinCEN, CTA) into shipped systems. Active practitioner of AI-augmented development with Claude Code, and a long-standing mentor across product teams."

PROFESSIONAL EXPERIENCE

SELECTED ROLES & CONTRIBUTIONS

FINTECH COMPLIANCE
PLATFORM

Sydecar

FULL-STACK SOFTWARE
ENGINEER

Compliance
&
Regulatory
Implementation

KYC/EDD/FINCEN

Designed and implemented Enhanced Due Diligence end-to-end: LP funding blocks, UBO verification, FinCEN integration, CTA compliance, automatic KYC revalidation. Worked directly with compliance SMEs to translate regulatory requirements into reliable, audit-friendly software. Built race-resistant verify-identity flows with re-check inside transactions (409 EMAIL_NOW_EXISTS).

COMPLIANCE KYC FINCEN REGULATORY

Full-Stack
TypeScript

REACT + NODE.JS +
POSTGRES

Operate across an Nx monorepo of dozens of NestJS (Node.js) libraries and React/Next.js apps. Built admin dashboards, internal operational tools, and stakeholder-facing UIs backed by PostgreSQL via Prisma ORM. Modern React patterns (hooks, Redux-style state, TanStack Query, Zod validation).

REACT NODE.JS POSTGRES PRISMA

REST API
Design

TYPE-SAFE
CONTRACTS

Migrated legacy controllers (auth, onboarding, admin) to type-safe ts-rest contracts with Zod schemas across NestJS microservices. Designed and shipped REST APIs for KYC/EDD, Billing V2, and webhook ingestion with strong contract guarantees and structured errors.

REST APIS TS-REST ZOD MICROSERVICES

Security &
Audit

IDEMPOTENCY + STATE
MACHINES

Implemented webhook deduplication via (unique) with PROCESSING/PROCESSED/REJECTED state machine. API-level idempotency interceptor (48h TTL). Audit-friendly append-only auxiliary tables with deterministic ordering — reconstructable event chains for compliance review.

SECURITY IDEMPOTENCY AUDIT OAUTH 2.0

Cloud &
Integration

OAUTH + SHARED
SERVICES

Built bidirectional QuickBooks invoice sync (OAuth 2.0 flow, refresh tokens, encrypted credentials). Worked on Plaid Link + Treasury Prime integrations. Same patterns transfer to integrating with agency shared services (authentication, data exchange).

PLAID TREASURY PRIME QUICKBOOKS OAUTH

AI-
augmented
Development

CLAUDE CODE DAILY

Daily user of Claude Code with sub-agent orchestration, custom skills, MCP integrations, hooks, and project-level CLAUDE.md specifications. Apply AI for code generation, automated review, and test scaffolding — staying at the forefront of AI-augmented engineering practices.

CLAUDE CODE AI TOOLING SUB-AGENTS

Agile
Delivery

SCRUM +
DOCUMENTATION

Engineering-led ownership of complex features (Billing V2, KYC revalidation) without a PM. Drive ADRs, technical specs, and architectural documentation. Cross-functional collaboration with compliance, finance, product, and QE teams.

MAY 2023 — PRESENT
SAN FRANCISCO, CA (REMOTE)

ENTERPRISE CLOUD APPLICATIONS Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Cloud Infrastructure AWS END-TO-END Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) supporting high-availability B2B workloads. Containerized services with Docker; built serverless React/Next.js apps. Owned operational health of production deployments. AWS ECS DOCKER LAMBDA Full-Stack Product REACT + NEXT.JS + GRAPHQL Built from scratch a wholesale ordering platform with React Native (mobile), React/Next.js (web), and a GraphQL API layer. Integrated payment flows and credit-limit validation. REACT NATIVE NEXT.JS GRAPHQL TYPESCRIPT CI/CD GITHUB ACTIONS Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Reduced release cycle from weeks to days. GITHUB ACTIONS FASTLANE CI/CD
CONSUMER PLATFORM Netlolo SR SOFTWARE ENGINEER SEP 2018 — JAN 2019 SÃO PAULO	Consumer Product REACT NATIVE + TYPESCRIPT Built a mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum. REACT NATIVE TYPESCRIPT WEB3 Real-time SDK XMPP Developed a chat SDK for businesses using React Native and React/Redux, powered by XMPP and a Java backend for real-time messaging across embedded integrations. REACT REDUX XMPP JAVA Zero-downtime CI/CD CONTINUOUS DEPLOYMENT Built CI/CD automations ensuring continuous deployment with no service interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQL HASURA CI/CD
MICROSERVICES PLATFORM Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Mentorship TECH TALKS LEAD Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture, coaching engineers across product teams. Established service-boundary and API-contract patterns adopted across the engineering org. Continuous learning and mentoring mindset has carried into every team since. MENTORSHIP TECH TALKS MICROSERVICES Multi-DB Operations PERSISTENCE SELECTION Built the product foundation with React, Redux, and Node.js/TypeScript backend. Selected MySQL, PostgreSQL, MongoDB per service responsibility and drove DB design across teams. REACT NODE.JS MONGODB CIRCLECI
LEGACY MODERNIZATION PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Legacy Migration PHP → NODE Led migration of a legacy PHP loan origination platform to a Node.js/Express backend for a student loans product with governmental funding. Modernized API surface while preserving downstream consumer compatibility — direct experience with legacy-to-modern migrations in regulated environments. LEGACY MIGRATION NODE.JS EXPRESS GOVERNMENT Database Performance POSTGRESQL Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. MongoDB for unstructured logs. POSTGRESQL MONGODB QUERY OPTIMIZATION

CORE SKILLS

FULL-STACK

TypeScript, React (hooks, Redux), Next.js, React Native, Node.js, NestJS, REST APIs, ts-rest, Zod, GraphQL

DATABASES & ORM

PostgreSQL (deep), MySQL, MongoDB, Prisma (similar to Hibernate/TypeORM/Entity Framework), Schema design, Query optimization

COMPLIANCE & SECURITY

KYC/EDD, FinCEN, CTA, OAuth 2.0, JWT, Idempotency, Audit trails, Secure credential management

CLOUD & DEVOPS

AWS (EC2/ECS/S3/Lambda/VPC), GCP, Docker, CI/CD (GitHub Actions, Fastlane, CircleCI), Nx Monorepo

AI ENGINEERING

Claude Code, Sub-agent orchestration, MCP servers, Custom skills, Prompt engineering, LLM-assisted development

QUALITY

TDD, Cucumber BDD, Playwright, Jest, Unit + Integration + E2E testing, Datadog

PROCESS & LEADERSHIP

Agile/Scrum, Jira-class tools, ADRs, Code reviews, Mentorship, Cross-functional collaboration
