

Jonathan Cruz

SENIOR PRODUCT ENGINEER · AI-FIRST FULL-STACK

📍 SÃO PAULO, BRAZIL ✉ JONATHAN.WILLIAN.TOD@GMAIL.COM 🌐 AKAMURAASAI 🔗 AKAMURAASAI.WORK

PROFILE

"Senior product engineer with 10+ years shipping full-stack web and platform products end-to-end. Daily user of Claude Code as a core part of the development workflow — sub-agent orchestration, custom skills, MCP integrations, project-level CLAUDE.md specifications, and pre/post-tool hooks. Strong in TypeScript across the stack (Next.js, React, NestJS, Prisma, PostgreSQL) with hands-on AWS Lambda + serverless, OAuth 2.0 + secure credentials, and real enterprise/SaaS API integrations. Care about outcomes — write the recommendation doc, push back when the ask isn't the real problem, ship, then validate."

FULL-STACK SOFTWARE ENGINEER

AI-First Development

CLAUDE CODE DAILY

Claude Code is a core part of my daily workflow: sub-agent orchestration for parallel exploration and review, custom project skills for repeatable tasks, MCP server integrations, pre/post-tool hooks for guardrails, and project-level specifications encoding architectural rules. Hands-on prompt engineering, eval-style code review, and LLM-assisted refactoring on a real production codebase.

CLAUDE CODE MCP SUB-AGENTS AI-FIRST

End-to-end Ownership

WITHOUT A PM

Drove Billing V2 design and delivery: wrote the ADR, ran stakeholder discovery with compliance/finance/product, defined the architecture, implemented, deployed, then followed up on adoption. Same pattern across the KYC/EDD revalidation system, ts-rest migration, and webhook standardization. Pushed back when the original ask didn't match the real problem; documented the recommendation.

END-TO-END ADRS STAKEHOLDER DISCOVERY

Full-Stack TypeScript

NEXT.JS + NESTJS + PRISMA + POSTGRES

Ship across an Nx monorepo of dozens of NestJS libraries and React/Next.js apps. Built admin dashboards, internal operational tools, and stakeholder-facing UIs backed by PostgreSQL via Prisma. Migrated legacy controllers (auth, onboarding, admin) to type-safe ts-rest + Zod contracts.

TYPESCRIPT NEXT.JS NESTJS PRISMA

Enterprise & SaaS Integrations

OAuth + SECURE CREDENTIALS

Built bidirectional QuickBooks invoice sync (OAuth 2.0 auth flow, refresh-token handling, encrypted credential storage). Worked on Plaid Link integration (createLinkToken → exchangePublicToken → access_token) with processor tokens powering ACH via Treasury Prime. Same patterns transfer to Salesforce/Workday/Workfront.

QUICKBOOKS PLAID OAUTH 2.0 SECURE CREDENTIALS

Serverless & Cloud

AWS LAMBDA + DATADOG

Built and operated platform services with AWS Lambda endpoints, integrated Datadog for tracing and alerting on critical paths. Event-driven flows using BullMQ Pro with the outbox pattern and Redis-based ordering.

AWS LAMBDA DATADOG BULLMQ SERVERLESS

Quality & Validation

TDD + CUCUMBER BDD + PLAYWRIGHT

Built full E2E test suite for QuickBooks integration with Playwright and Cucumber BDD using mock services. Validate features after launch — confirm usage, measure goal achievement, iterate.

PLAYWRIGHT CUCUMBER BDD VALIDATION

MAY 2023 — PRESENT
SAN FRANCISCO, CA (REMOTE)

B2B WEB & MOBILE PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Full-Stack Product REACT NATIVE + NEXT.JS + GRAPHQL REACT NATIVE NEXT.JS GRAPHQL Built from scratch a wholesale ordering platform with mobile (React Native) and web (React, Next.js) clients, GraphQL API layer, integrated payment flows, and credit-limit validation.
	AWS Infrastructure SERVERLESS OPERATIONS AWS LAMBDA DOCKER SERVERLESS Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) with serverless React/Next.js apps. Containerized with Docker. Owned operational health of production deployments end-to-end.
	CI/CD QUALITY GATES GITHUB ACTIONS FASTLANE CI/CD Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Reduced release cycle from weeks to days.

CONSUMER WEB + MOBILE Netlolo SR SOFTWARE ENGINEER SEP 2018 — JAN 2019 SÃO PAULO	Consumer Full-Stack REACT NATIVE + TYPESCRIPT REACT NATIVE TYPESCRIPT WEB3 Built a consumer mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum for self-custodial wallets.
	Real-time Streaming CHAT SDK XMPP REAL-TIME STREAMING SDK Designed and shipped a chat SDK with React Native and React/Redux on top of XMPP and a Java backend — persistent connections, message ordering, low-latency delivery. Same primitives as modern streaming AI responses.
	Zero-downtime CI/CD CONTINUOUS DEPLOYMENT POSTGRESQL HASURA CI/CD Built CI/CD automations ensuring continuous deployment without interruption. PostgreSQL with Hasura as the GraphQL layer.

CONSUMER HEALTHCARE Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Healthcare Product REACT + NODE.JS/TYPESCRIPT HEALTHCARE REACT NODE.JS Built the product foundation with React, Redux, and a Node.js/TypeScript backend for consumer healthcare services. Lead capture, eligibility checks, provider matching — same compliance-aware data handling discipline applied across all integration points.
	Microservices MENTORSHIP MICROSERVICES MYSQL POSTGRESQL MONGODB Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture. Selected MySQL, PostgreSQL, and MongoDB per service responsibility. Established patterns adopted across the engineering org.

BACKEND & PLATFORM PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Legacy Modernization PHP → NODE NODE.JS EXPRESS LEGACY MIGRATION Migrated legacy PHP origination platform to Node.js/Express for a student loans product, preserving downstream compatibility while modernizing API surface.
	Database Performance SCHEMA & INDEXING POSTGRESQL MONGODB QUERY OPTIMIZATION Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude.

CORE SKILLS

AI ENGINEERING

Claude Code (daily), Sub-agent orchestration, MCP servers, Custom project skills, Spec-driven development, Prompt engineering, LLM API integration (Anthropic, OpenAI), Streaming responses

FULL-STACK

TypeScript, Next.js, React, React Native, NestJS, Node.js, Prisma, ts-rest, Zod, GraphQL, REST APIs

CLOUD & SERVERLESS

AWS (Lambda, S3, ECS, VPC), GCP, Vercel, Docker, Serverless workflows

DATA

PostgreSQL (deep), MySQL, MongoDB, Redis, Schema design, Query optimization

SECURITY & INTEGRATIONS

OAuth 2.0, JWT, Secure credential management, Webhook signatures, Enterprise & SaaS API integrations (Plaid, Treasury Prime, QuickBooks)

QUALITY

TDD, Cucumber BDD, Playwright, Datadog observability

PRODUCT MINDSET

Stakeholder discovery, Recommendation docs, ADRs, Mentorship, Post-launch validation

LANGUAGES

PORTUGUESE

Native

ENGLISH

C1/C2

EDUCATION
