

Jonathan Cruz

SENIOR FULL-STACK ENGINEER · FINTECH & CONSUMER APPLICATIONS

📍 SÃO PAULO, BRAZIL ✉ JONATHAN.WILLIAN.TOD@GMAIL.COM 🌐 AKAMURAASAI 🔗 AKAMURAASAI.WORK

PROFILE

"Senior full-stack engineer with 10+ years building consumer-facing and mission-critical applications across fintech, B2B, and crypto. Deep JavaScript/TypeScript expertise – Node.js (NestJS), React, React Native – with strong PostgreSQL, GraphQL, and REST API skills. Track record of owning greenfield projects end-to-end: writing ADRs, partnering with non-technical stakeholders, and shipping under real production traffic. Built for high-ownership, collaborative teams where engineering judgment compounds."

PROFESSIONAL EXPERIENCE

SELECTED ROLES & CONTRIBUTIONS

FINTECH SAAS PLATFORM Sydecar FULL-STACK SOFTWARE ENGINEER MAY 2023 — PRESENT SAN FRANCISCO, CA (REMOTE)	Greenfield Fintech Initiatives KYC/EDD + BILLING V2 Designed and shipped Enhanced Due Diligence end-to-end (UBO verification, FinCEN integration, CTA compliance, automatic KYC revalidation) and led Billing V2 architecture via ADRs without a PM — both new initiatives in a production fintech platform. FINTECHGREENFIELDADRSKYC
	JavaScript / Node.js NESTJS MICROSERVICES Build and operate Node.js services with NestJS across an Nx monorepo of dozens of libraries. Type-safe contracts (ts-rest + Zod), OAuth 2.0, idempotency interceptors, webhook deduplication. Production JavaScript/TypeScript discipline at scale. NODE.JSNESTJSTYPESCRIPTTS-REST
	React + Next.js PRODUCTION UIs Build and maintain React/Next.js apps for stakeholder-facing UIs, admin dashboards, and operational tools. Modern React patterns (hooks, context, Redux-style state), TanStack Query, Zod runtime validation. REACTNEXT.JSTANSTACK QUERY
	PostgreSQL Deep SCHEMA & PERFORMANCE Operate PostgreSQL via Prisma — schema design, indexing, transaction isolation, query performance tuning. Raw SQL when complex aggregations or reporting require it. Auxiliary tables with deterministic ordering for compliance review. POSTGRESQLPRISMASQL
	GraphQL Heritage At Sydecar use REST + ts-rest contracts; earlier roles at Zax and Netlolo shipped GraphQL APIs (Hasura + Apollo) on top of PostgreSQL. Comfortable across both contract styles. GRAPHQLRESTHASURA
	External Integrations REAL PRODUCTION WORKFLOWS Built bidirectional QuickBooks invoice sync (OAuth 2.0, state validation, mock service, full E2E). Worked on Plaid + Treasury Prime integrations powering ACH transfers. Hands-on with auth flows, refresh tokens, and production debugging. QUICKBOOKSPLAIDTREASURY PRIMEOAUTH
	Ownership Mindset NO PM REQUIRED Drove major initiatives end-to-end without a PM: discovery, ADR, schema and API design, implementation, deploy, post-launch validation. Engineering-led ownership across compliance, finance, and product touchpoints. CROSS-FUNCTIONALDISCOVERYOWNERSHIP

B2B CONSUMER-FACING PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Consumer-facing Full-Stack REACT NATIVE + NEXT.JS + GRAPHQL Built from scratch a B2B wholesale ordering platform consumed by thousands of business partners. React Native (mobile), React/Next.js (web), TypeScript, GraphQL. Integrated payment flows and credit-limit validation across the stack. REACT NATIVE NEXT.JS GRAPHQL TYPESCRIPT AWS Production CLOUD OPERATIONS Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) with serverless React/Next.js apps. Containerized with Docker. Owned operational health of consumer-facing production. AWS ECS DOCKER LAMBDA CI/CD VELOCITY Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Reduced release cycle from weeks to days. GITHUB ACTIONS FASTLANE CI/CD
CONSUMER MOBILE FINTECH Netlolo SR SOFTWARE ENGINEER SEP 2018 — JAN 2019 SÃO PAULO	Consumer Crypto Product REACT NATIVE + WEB3 Built a mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum for self-custodial wallets. REACT NATIVE TYPESCRIPT WEB3 ETHEREUM Real-time SDK PERSISTENT CONNECTIONS Designed and shipped a chat SDK with React Native and React/Redux on top of XMPP and a Java backend — persistent connections, message ordering, low-latency delivery. REACT REDUX XMPP REAL-TIME Zero-downtime CI/CD CONTINUOUS DEPLOYMENT Built CI/CD automations ensuring continuous deployment without service interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQL HASURA GRAPHQL
CONSUMER HEALTHCARE Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Mentorship TECH TALKS LEAD Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture, coaching engineers across product teams. Established service-boundary and API-contract patterns adopted org-wide. MENTORSHIP TECH TALKS MICROSERVICES Multi-DB Operations PERSISTENCE SELECTION Built the consumer healthcare product foundation with React, Redux, and a Node.js/TypeScript backend. Selected MySQL, PostgreSQL, MongoDB per service responsibility with hands-on operational ownership. MYSQL POSTGRESQL MONGODB CIRCLECI
LENDING FINTECH PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Loan Origination LEGACY MODERNIZATION Migrated legacy PHP origination platform to a Node.js/Express backend for a student loans product with governmental funding. Modernized API surface while preserving downstream compatibility. NODE.JS EXPRESS LENDING FINTECH SQL Performance SCHEMA & INDEXING Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. POSTGRESQL MONGODB QUERY OPTIMIZATION

CORE SKILLS

JAVASCRIPT / TYPESCRIPT

Node.js, NestJS, ts-rest, Zod, REST APIs, GraphQL, OAuth 2.0, Microservices

FRONTEND

React (hooks, context, Redux), Next.js, React Native, TanStack Query, modern web patterns

DATA

PostgreSQL (deep), MySQL, MongoDB, Redis, Prisma, Raw SQL when appropriate, Query optimization

CLOUD & DEVOPS

AWS (EC2/ECS/S3/Lambda/VPC), GCP, Docker, CI/CD (GitHub Actions, Fastlane, CircleCI), Nx Monorepo

FINTECH DOMAIN

KYC/EDD, FinCEN, CTA, Payments (Plaid, Treasury Prime, ACH), QuickBooks, Idempotency, Audit trails, OAuth 2.0

QUALITY

TDD, Cucumber BDD, Playwright, Jest, Datadog observability

AI ENGINEERING

Claude Code (daily), Sub-agent orchestration, MCP servers, Custom skills/hooks, LLM-assisted development

LEADERSHIP

ADRs, End-to-end ownership, Mentorship, Cross-functional partnership

LANGUAGES

PORTUGUESE

Native

ENGLISH

C1/C2

EDUCATION

Anhanguera

BACHELOR OF TECHNOLOGY (B.TECH.) IN INFORMATION TECHNOLOGY ·
JAN 2016 — JUL 2018
