

Jonathan Cruz

SENIOR SOFTWARE ENGINEER · FULL-STACK & CUSTOMER PLATFORMS

📍 SÃO PAULO, BRAZIL ✉ JONATHAN.WILLIAN.TOD@GMAIL.COM 🌐 AKAMURAASAI 🔗 AKAMURAASAI.WORK

PROFILE

"Senior full-stack engineer with 10+ years building consumer and B2B products across web and mobile. Strong in TypeScript end-to-end — React, React Native, NestJS, Postgres — with deep experience in microservices, REST API design, event-driven architecture, and automated testing (TDD, Cucumber BDD, Playwright). Comfortable partnering with non-engineering stakeholders to translate operational pain into shipped tools. Daily user of AI coding tools (Claude Code with sub-agents and skills) — actively exploring opportunities to apply LLMs to internal-ops and customer-facing workflows."

FULL-STACK SOFTWARE ENGINEER

AI Engineering

CLAUDE CODE IN PRODUCTION

Daily user of Claude Code with sub-agent orchestration, custom skills, project-level CLAUDE.md specifications, and pre/post-tool hooks for guardrails. Apply LLMs for code generation, automated review, and test scaffolding. Actively exploring applying agent-based workflows to internal-ops tooling.

CLAUDE CODE AGENTIC WORKFLOWS LLM AI

Internal Tools

CROSS-TEAM PARTNERSHIP

Designed and shipped admin UIs and operational tools for compliance and finance teams: Billing V2 admin (quarterly fee scheduler, billing model versioning), KYC/EDD revalidation flows, and the QuickBooks bidirectional invoice sync engine. Partnered directly with non-technical stakeholders through structured discovery and ADRs — same pattern as building tools for a Community Support org.

INTERNAL TOOLS ADRS CROSS-FUNCTIONAL

Full-Stack TypeScript

NESTJS + REACT

Operate across an Nx monorepo of dozens of NestJS libraries and React/Next.js apps. Migrated legacy controllers (auth, onboarding, admin) to type-safe ts-rest contracts with Zod schemas — eliminating contract-mismatch bugs and improving end-to-end developer experience.

TYPESCRIPT NESTJS REACT TS-REST

Automated Testing

TDD + CUCUMBER BDD

Built full E2E test suite for QuickBooks integration using Playwright and Cucumber BDD with mock services for local dev, plus a mock banking engine for Plaid + Treasury Prime ACH flows. Tests run in CI on every PR.

PLAYWRIGHT CUCUMBER BDD E2E TESTING CI

Event-driven Reliability

BULLMQ + OUTBOX

Standardized event delivery using BullMQ Pro with exponential backoff and the outbox pattern (persist resolution first, enqueue after). Implemented webhook deduplication and an API-level idempotency interceptor used by all teams in the monorepo.

BULLMQ OUTBOX IDEMPOTENCY REDIS

External Integrations

SAAS APIS

Built and maintained bidirectional integrations with third-party SaaS providers (QuickBooks, Plaid, Treasury Prime) — including state validation, auto-sync on approval, and mock services for local sandbox. Transferable to integrating Contact Center, Knowledge Base, and Voice platforms.

QUICKBOOKS PLAID TREASURY PRIME REST APIS

MAY 2023 — PRESENT
SAN FRANCISCO, CA (REMOTE)

B2B CUSTOMER-FACING PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Consumer Mobile + Web FULL-STACK Built from scratch a wholesale ordering platform with React Native, TypeScript, and GraphQL, including integrated payment flows and credit-limit validation for thousands of business partners. Customer-facing scale across mobile and web. REACT NATIVE TYPESCRIPT GRAPHQL
OPERATIONAL OWNERSHIP AWS ECS DOCKER LAMBDA	Infrastructure Containerized services with Docker. Owned the operational health of customer-facing production deployments. Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Treated release-time toil as an engineering problem — reduced release cycle from weeks to days. GITHUB ACTIONS FASTLANE CI/CD
CI/CD REDUCING TOIL	
CONSUMER REAL-TIME PLATFORM Netlolo SR SOFTWARE ENGINEER JAN 2018 — JAN 2019 SÃO PAULO	Real-time Messaging SDK EMBEDDED USE CASES Designed and shipped a chat SDK with React Native and React/Redux on top of XMPP and a Java backend — handling persistent connections, message ordering, and low-latency delivery for businesses embedding chat into their own apps. Same architectural concerns as community/support messaging platforms. XMPP REAL-TIME SDK PERSISTENT CONNECTIONS
Crypto Consumer Product REACT NATIVE + WEB3	Built a mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum. REACT NATIVE TYPESCRIPT WEB3
Zero- downtime Deploys CI/CD	Built CI/CD automations ensuring continuous deployment with no service interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQL HASURA CI/CD
CONSUMER MICROSERVICES Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Mentorship LEADING BY EXAMPLE Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture, coaching engineers across product teams. Established service-boundary and API-contract patterns adopted across the engineering org. MENTORSHIP TECH TALKS MICROSERVICES
MICROSERVICES MULTI-DB	Built the consumer-healthcare product foundation with React, Redux, and Node.js/TypeScript backend. Selected MySQL, PostgreSQL, MongoDB per service responsibility and drove DB design across teams. REACT NODE.JS MONGODB CIRCLECI
LEGACY MODERNIZATION PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	PHP → Node PLATFORM MIGRATION Migrated legacy PHP loan origination platform to Node.js/Express backend for a student loans product with governmental funding, modernizing API surface while preserving downstream compatibility. NODE.JS EXPRESS LEGACY MIGRATION
Database Performance SCHEMA & INDEXING	Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. MongoDB for request logs and unstructured data. POSTGRESQL MONGODB QUERY OPTIMIZATION

CORE SKILLS

FULL-STACK

TypeScript, React, React Native, Next.js, NestJS, Node.js, GraphQL, REST APIs, ts-rest, Zod

TESTING & QUALITY

TDD, Cucumber BDD, Playwright, Unit + Integration + E2E, Code reviews

AI ENGINEERING

Claude Code, Sub-agent orchestration, Agentic workflows, LLM-based code review and testing, Spec-driven development

BACKEND & DATA

PostgreSQL, MySQL, MongoDB, Prisma, Microservices, Event-driven, BullMQ, Redis, Outbox pattern, Idempotency

CLOUD & DEVOPS

AWS (EC2/ECS/S3/Lambda/VPC), GCP, Docker, CI/CD (GitHub Actions, Fastlane, CircleCI), Nx Monorepo

REAL-TIME

Chat SDK, XMPP, Persistent connections, Hasura GraphQL subscriptions

LEADERSHIP

Cross-functional collaboration, ADRs, Mentorship, Tech Talks, Stakeholder discovery
