

Jonathan Cruz

SENIOR PRODUCT ENGINEER · AI-FIRST FULL-STACK

📍 SÃO PAULO, BRAZIL ✉ JONATHAN.WILLIAN.TOD@GMAIL.COM 🌐 AKAMURAASAI 🔗 AKAMURAASAI.WORK

PROFILE

"Senior product engineer with 10+ years shipping full-stack web and platform products end-to-end. Daily user of Claude Code as a core part of the development workflow – sub-agent orchestration, custom skills, MCP integrations, project-level CLAUDE.md specifications, and pre/post-tool hooks. Strong in TypeScript across the stack (Next.js, React, NestJS, Prisma, PostgreSQL) with hands-on AWS Lambda + serverless, OAuth 2.0 + secure credentials, and real enterprise/SaaS API integrations. Care about outcomes – write the recommendation doc, push back when the ask isn't the real problem, ship, then validate."

PROFESSIONAL EXPERIENCE

SELECTED ROLES & CONTRIBUTIONS

FINTECH PLATFORM Sydecar FULL-STACK SOFTWARE ENGINEER	AI-First Development CLAUDE CODE DAILY Claude Code is a core part of my daily workflow: sub-agent orchestration for parallel exploration and review, custom project skills for repeatable tasks, MCP server integrations, pre/post-tool hooks for guardrails, and project-level specifications encoding architectural rules. Hands-on prompt engineering, eval-style code review, and LLM-assisted refactoring on a real production codebase. CLAUDE CODEMCPSUB-AGENTS
	End-to-end Ownership WITHOUT A PM Drove Billing V2 design and delivery: wrote the ADR, ran stakeholder discovery with compliance/finance/product, defined the architecture, implemented, deployed, then followed up on adoption. Same pattern across the KYC/EDD revalidation system, ts-rest migration, and webhook standardization. Pushed back when the original ask didn't match the real problem; documented the recommendation. END-TO-ENDADRSSTAKEHOLDER DISCOVERY
	Full-Stack TypeScript NEXT.JS + NESTJS + PRISMA + POSTGRES Ship across an Nx monorepo of dozens of NestJS libraries and React/Next.js apps. Built admin dashboards, internal operational tools, and stakeholder-facing UIs backed by PostgreSQL via Prisma. Migrated legacy controllers (auth, onboarding, admin) to type-safe ts-rest + Zod contracts. TYPESCRIPTNEXT.JSNESTJS
	Enterprise & SaaS Integrations OAuth + SECURE CREDENTIALS Built bidirectional QuickBooks invoice sync (OAuth 2.0 auth flow, refresh-token handling, encrypted credential storage). Worked on Plaid Link integration (createLinkToken → exchangePublicToken → access_token) with processor tokens powering ACH via Treasury Prime. Same patterns transfer to Salesforce/Workday/Workfront. QUICKBOOKSPLAID
	Serverless & Cloud AWS LAMBDA + DATADOG Built and operated platform services with AWS Lambda endpoints, integrated Datadog for tracing and alerting on critical paths. Event-driven flows using BullMQ Pro with the outbox pattern and Redis-based ordering. AWS LAMBDA
	Quality & Validation TDD + CUCUMBER BDD + PLAYWRIGHT Built full E2E test suite for QuickBooks integration with Playwright and Cucumber BDD using mock services. Validate features after launch — confirm usage, measure goal achievement, iterate. PLAYWRIGHTCUCUMBER BDD
MAY 2023 — PRESENT SAN FRANCISCO, CA (REMOTE)	

B2B WEB & MOBILE PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Full-Stack Product REACT NATIVE + NEXT.JS + GRAPHQL Built from scratch a wholesale ordering platform with mobile (React Native) and web (React, Next.js) clients, GraphQL API layer, integrated payment flows, and credit-limit validation. REACT NATIVE NEXT.JS GRAPHQL AWS Infrastructure SERVERLESS OPERATIONS Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) with serverless React/Next.js apps. Containerized with Docker. Owned operational health of production deployments end-to-end. AWS LAMBDA DOCKER SERVERLESS CI/CD QUALITY GATES Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Reduced release cycle from weeks to days. GITHUB ACTIONS FASTLANE CI/CD
CONSUMER WEB + MOBILE Netlolo SR SOFTWARE ENGINEER SEP 2018 — JAN 2019 SÃO PAULO	Consumer Full-Stack REACT NATIVE + TYPESCRIPT Built a consumer mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum for self-custodial wallets. REACT NATIVE TYPESCRIPT WEB3 Real-time Streaming CHAT SDK Designed and shipped a chat SDK with React Native and React/Redux on top of XMPP and a Java backend — persistent connections, message ordering, low-latency delivery. Same primitives as modern streaming AI responses. XMPP REAL-TIME STREAMING SDK Zero-downtime CI/CD CONTINUOUS DEPLOYMENT Built CI/CD automations ensuring continuous deployment without interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQL HASURA CI/CD
CONSUMER HEALTHCARE Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Healthcare Product REACT + NODE.JS/TYPESCRIPT Built the product foundation with React, Redux, and a Node.js/TypeScript backend for consumer healthcare services. Lead capture, eligibility checks, provider matching — same compliance-aware data handling discipline applied across all integration points. HEALTHCARE REACT NODE.JS Microservices MENTORSHIP Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture. Selected MySQL, PostgreSQL, and MongoDB per service responsibility. Established patterns adopted across the engineering org. MICROSERVICES MYSQL POSTGRESQL MONGODB
BACKEND & PLATFORM PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Legacy Modernization PHP → NODE Migrated legacy PHP origination platform to Node.js/Express for a student loans product, preserving downstream compatibility while modernizing API surface. NODE.JS EXPRESS LEGACY MIGRATION Database Performance SCHEMA & INDEXING Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. POSTGRESQL MONGODB QUERY OPTIMIZATION

CORE SKILLS

AI ENGINEERING

Claude Code (daily), Sub-agent orchestration, MCP servers, Custom project skills, Spec-driven development, Prompt engineering, LLM API integration (Anthropic, OpenAI), Streaming responses

FULL-STACK

TypeScript, Next.js, React, React Native, NestJS, Node.js, Prisma, ts-rest, Zod, GraphQL, REST APIs

CLOUD & SERVERLESS

AWS (Lambda, S3, ECS, VPC), GCP, Vercel, Docker, Serverless workflows

DATA

PostgreSQL (deep), MySQL, MongoDB, Redis, Schema design, Query optimization

SECURITY & INTEGRATIONS

OAuth 2.0, JWT, Secure credential management, Webhook signatures, Enterprise & SaaS API integrations (Plaid, Treasury Prime, QuickBooks)

QUALITY

TDD, Cucumber BDD, Playwright, Datadog observability

PRODUCT MINDSET

Stakeholder discovery, Recommendation docs, ADRs, Mentorship, Post-launch validation

LANGUAGES

PORTUGUESE

Native

ENGLISH

C1/C2

EDUCATION

Anhanguera

BACHELOR OF TECHNOLOGY (B.TECH.) IN INFORMATION TECHNOLOGY · JAN 2016 — JUL 2018
