PROFILE

"Senior full-stack engineer with 10+ years shipping production web applications and complex backend systems. AI-native daily practitioner — Claude Code with sub-agent orchestration, custom skills, MCP integrations, hooks, and project-level specifications.

Strong React 18 + Redux + TypeScript + Jest expertise on the frontend, with deep RESTful API design and microservices on the backend. Mentor and tech lead — driving code quality, pair programming, and architecture decisions that balance pragmatism and long-term sustainability."

ENGINEER

AI-Native Workflows

DAILY CLAUDE CODE
PRACTITIONER

Claude Code is a core part of my daily workflow: sub-agent orchestration for parallel exploration and review, custom project skills for repeatable tasks, MCP server integrations, pre/post-tool hooks for guardrails, project-level specifications. Prompt engineering, eval-style AI output review, and coaching teammates on appropriate tool usage for each task.

CLAUDE CODE AI-NATIVE PROMPT ENGINEERING MCP

React + Redux + TypeScript

FRONTEND AT SCALE

Built and maintained React/Next.js apps across an Nx monorepo: admin dashboards, internal operational tools, KYC/EDD flows, Billing V2 admin UI. Modern React patterns (hooks, context), TanStack Query for data fetching, Zod for runtime validation. Strong end-to-end TypeScript discipline.

REACT TYPESCRIPT NEXT.JS ZOD

RESTful API Design

TYPE-SAFE CONTRACTS

Migrated legacy controllers (auth, onboarding, admin) to type-safe ts-rest + Zod contracts across dozens of NestJS microservices. Designed and shipped Enhanced Due Diligence APIs (KYC, UBO, FinCEN, CTA) end-to-end. Production REST API patterns: pagination, idempotency, OAuth 2.0, structured errors.

REST APIS TS-REST NESTJS OAUTH

Architecture & Code Quality

MENTOR + CODE REVIEWS

Drove architecture decisions via ADRs (Billing V2, ts-rest migration, webhook standardization). Set quality standards through code reviews, pair sessions, and shared CLAUDE.md project conventions. Mentor mid-to-senior engineers — pragmatic solutions that balance shipping speed with sustainability.

ARCHITECTURE ADRS CODE REVIEWS MENTORSHIP

Testing

JEST + PLAYWRIGHT +
CUCUMBER BDD

Built unit, integration, and E2E test suites integrated into CI on every PR. Used Jest for unit tests, Playwright + Cucumber BDD for full E2E coverage (QuickBooks invoice sync). Treat testing as a first-class delivery concern.

JEST PLAYWRIGHT CUCUMBER BDD CI/CD

Cross-function- al Delivery

PRODUCT + QE +
STAKEHOLDERS

Partnered with Product, compliance, and finance teams to translate requirements into shipped features. Engineering-led ownership without a PM. Documented decisions clearly so QE and downstream consumers can validate and extend.

CROSS-FUNCTIONAL STAKEHOLDER DISCOVERY DOCUMENTATION

MAY 2023 — PRESENT
SAN FRANCISCO, CA (REMOTE)

B2B FULL-STACK PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Full-Stack Product REACT + NEXT.JS + REACT NATIVE Cloud Infrastructure AWS + CI/CD Built from scratch a B2B wholesale ordering platform with React/Next.js for web, React Native for mobile, TypeScript + GraphQL. Integrated payment flows and credit-limit validation across the stack. REACTNEXT.JSREACT NATIVEGRAPHQL Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) with serverless React/Next.js apps. Configured end-to-end CI/CD with GitHub Actions, Fastlane, Code Climate — automated quality gates reduced release cycle from weeks to days. AWSDOCKERGITHUB ACTIONSCI/CD
CONSUMER REAL-TIME PLATFORM Netlolo SR SOFTWARE ENGINEER SEP 2018 — JAN 2019 SÃO PAULO	Real-time SDK EMBEDDED USE CASES Crypto Consumer Product REACT NATIVE + WEB3 Zero-downtime CI/CD CONTINUOUS DEPLOYMENT Designed and shipped a chat SDK with React Native and React/Redux on top of XMPP and a Java backend — persistent connections, message ordering, low-latency delivery for businesses embedding chat into their apps. REACT NATIVEREACT/REDUXXMPPJAVA Built a mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum. REACT NATIVETYPESCRIPTWEB3 Built CI/CD automations ensuring continuous deployment without service interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQLHASURACI/CD
MICROSERVICES PLATFORM Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Mentorship TECH TALKS LEAD Microservices MULTI-DB Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture, coaching engineers across product teams. Established service-boundary and API-contract patterns adopted across the engineering org. MENTORSHIPTECH TALKSMICROSERVICES Built the product foundation with React, Redux, and a Node.js/TypeScript backend across multiple microservices. Selected MySQL, PostgreSQL, and MongoDB per service responsibility and drove DB design across teams. REACTREDUXNODE.JSMONGODB
BACKEND & FRONTEND PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Legacy Modernization PHP → NODE Database Performance SCHEMA & INDEXING Migrated legacy PHP origination platform to Node.js/Express for a student loans product, modernizing the API surface while preserving downstream compatibility. NODE.JSEXPRESSLEGACY MIGRATION Restructured transactional database tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. Built the React/Redux frontend for the loan request flow. POSTGRESQLREACTREDUX

CORE SKILLS

AI-NATIVE DEVELOPMENT

Claude Code, ChatGPT, Sub-agent orchestration, MCP servers, Custom skills/hooks, Spec-driven development, Prompt engineering, AI output evaluation, Coaching teammates on AI usage

FRONTEND

React 18 (hooks, context), Redux, TypeScript, Next.js, React Native, TanStack Query, Zod, Jest, HTML, CSS

BACKEND

NestJS, Node.js, TypeScript, RESTful API design, ts-rest, GraphQL, Microservices

DATA

PostgreSQL (deep), MySQL, MongoDB, Redis, Prisma, Schema design, Query optimization

CLOUD & DEVOPS

AWS (EC2/ECS/S3/Lambda/VPC), GCP, Docker, CI/CD (GitHub Actions, Fastlane, CircleCI), Nx Monorepo

QUALITY

Jest, Playwright, Cucumber BDD, TDD, Datadog observability

LEADERSHIP

Code reviews, Pair programming, ADRs, Mentorship, Architecture decisions, Cross-functional collaboration
