

Jonathan Cruz

SENIOR SOFTWARE ENGINEER · FULL-STACK CLOUD PLATFORMS

📍 SÃO PAULO, BRAZIL ✉ JONATHAN.WILLIAN.TOD@GMAIL.COM 🌐 AKAMURAASAI 🔗 AKAMURAASAI.WORK

PROFILE

"Senior software engineer with 10+ years designing and delivering large-scale cloud-based platforms end-to-end. Full-stack expertise in TypeScript across the stack — Node.js, NestJS, React, React Native — with deep experience in REST API design, OAuth 2.0/JWT, microservices, PostgreSQL (and MySQL/MongoDB/Redis), Docker, CI/CD, and APM with Datadog. Active practitioner of LLM-powered workflows in production using Claude Code. Mentor and tech lead who has guided engineers from junior to senior, set technical direction across cross-functional squads, and consistently shipped complex features end-to-end."

PROFESSIONAL EXPERIENCE

SELECTED ROLES & CONTRIBUTIONS

CLOUD PLATFORM Sydecar FULL-STACK SOFTWARE ENGINEER	LLM-powered Workflows CLAUDE CODE IN PRODUCTION Daily user of Claude Code with sub-agent orchestration, custom skills, project-level CLAUDE.md specifications, and pre/post-tool hooks for guardrails. Integrated LLM-powered review, test scaffolding, and code generation into the development workflow — production-ready prompt engineering and AI-feature integration. LLMAI INTEGRATIONPROMPT ENGINEERING
Microservices Architecture NESTJS + REST + OAUTH/JWT Operate across an Nx monorepo of dozens of NestJS microservices and React/Next.js apps. Designed and delivered the Enhanced Due Diligence system (KYC, UBO, FinCEN, CTA) end-to-end and led Billing V2 architecture via ADRs without a PM. Built type-safe ts-rest + Zod contracts across services. JWT-based auth and API key authentication. NESTJSRESTOAUTH/JWTMICROSERVICES	
Cloud-based Platform PRISMA + POSTGRES AT SCALE Built and operated platform services on PostgreSQL with Prisma — schema design, indexing, query optimization, transactional consistency. Auxiliary tables with deterministic ordering via Redis INCR counters. Datadog for tracing and alerting on critical paths. POSTGRESQLPRISMAREDISDATADOG	
Reliability & Performance EVENT-DRIVEN PATTERNS Standardized event delivery using BullMQ Pro with exponential backoff and the outbox pattern (persist resolution first, enqueue after — jobs idempotent, survive enqueue failure). Webhook deduplication via state machines and API-level idempotency interceptor (48h TTL). BULLMQOUTBOXIDEMPOTENCYRELIABILITY	
Mentorship & Technical Direction CROSS-FUNCTIONAL SQUADS Mentor mid-to-entry engineers through code reviews, ADRs, and pair sessions. Drove cross-functional alignment with compliance, finance, and product teams without a PM — communicating architectural tradeoffs to technical and non-technical audiences. MENTORSHIPADRS CROSS-FUNCTIONAL	
Quality & Automation TDD + CUCUMBER BDD + PLAYWRIGHT Built full E2E test suite for QuickBooks integration using Playwright and Cucumber BDD with mock services. Integrated unit, integration, and E2E tests into CI/CD running on every PR. Treated quality as a first-class delivery concern. PLAYWRIGHTCUCUMBER BDDCI/CD	

MAY 2023 — PRESENT
SAN FRANCISCO, CA (REMOTE)

B2B CLOUD PLATFORM Zax SR SOFTWARE ENGINEER JAN 2019 — MAY 2023 SÃO PAULO	Cloud Hosting AWS PRODUCTION OPERATIONS Deployed and operated full cloud infrastructure on AWS (EC2, ECS, S3, Lambda, VPCs) supporting high-availability B2B workloads. Containerized services with Docker; built serverless React/Next.js apps. Owned the operational health of production deployments. AWS ECS DOCKER LAMBDA Full-Stack Product REACT NATIVE + TYPESCRIPT + GRAPHQL Built from scratch a wholesale ordering platform with integrated payment flows and credit-limit validation for business partners. React Native for mobile, React/Next.js for web, GraphQL API layer. REACT NATIVE TYPESCRIPT GRAPHQL CI/CD & Build Automation QUALITY GATES Configured end-to-end pipeline with GitHub Actions, Fastlane, and Code Climate for automated quality gates. Reduced release cycle from weeks to days. Static code analysis integrated into every PR. GITHUB ACTIONS FASTLANE CI/CD
CONSUMER CLOUD PRODUCT Netlolo SR SOFTWARE ENGINEER JAN 2018 — JAN 2019 SÃO PAULO	Real-time SDK MULTI-TENANT EMBEDDED USE Designed and shipped a chat SDK for businesses to embed in their apps using React Native, React/Redux, XMPP, and a Java backend. Handled persistent connections, message ordering, and low-latency delivery. Same architectural concerns as customer-facing real-time platforms. XMPP REAL-TIME SDK PERSISTENT CONNECTIONS Crypto Consumer Product WEB3 Built a mobile and web product bringing cryptocurrency to mainstream users with React Native and TypeScript, integrating Web3 smart contracts on Ethereum. REACT NATIVE TYPESCRIPT WEB3 Zero-downtime Deploys CI/CD Built CI/CD automations ensuring continuous deployment without service interruption. PostgreSQL with Hasura as the GraphQL layer. POSTGRESQL HASURA CI/CD
MICROSERVICES PLATFORM Escale SR SOFTWARE ENGINEER JAN 2018 — SEP 2018 SÃO PAULO	Mentorship TECH TALKS Led internal Tech Talks on RESTful design, Functional Programming, and Microservices architecture, coaching engineers across product teams. Established service-boundary and API-contract patterns adopted across the engineering org. MENTORSHIP TECH TALKS MICROSERVICES Multi-DB Operations PERSISTENCE SELECTION Built the product foundation with React, Redux, and a Node.js/TypeScript backend. Drove DB selection per service — MySQL, PostgreSQL, MongoDB — with hands-on operational ownership for each. MYSQL POSTGRESQL MONGODB CIRCLECI
BACKEND PLATFORM PraValer PL SOFTWARE ENGINEER JUN 2017 — JAN 2018 SÃO PAULO	Legacy Modernization PHP → NODE Led migration of legacy PHP origination platform to Node.js/Express backend for a student loans product with governmental funding. Modernized API surface while preserving downstream compatibility. NODE.JS EXPRESS LEGACY MIGRATION Database Performance SCHEMA & INDEXING Restructured PostgreSQL transactional tables with improved schemas and indexes, eliminating N+1 queries and reducing query times by an order of magnitude. MongoDB for unstructured logs. POSTGRESQL MONGODB QUERY OPTIMIZATION

CORE SKILLS

FULL-STACK

TypeScript, Node.js, NestJS, React (hooks, context, Redux), Next.js, React Native, GraphQL

APIS & AUTH

REST API design, OAuth 2.0, JWT, ts-rest, Zod, Microservices patterns

DATABASES

PostgreSQL (deep), MySQL, MongoDB, Redis, Query optimization, Schema design

CLOUD & DEVOPS

AWS (EC2/ECS/S3/Lambda/VPC), GCP, Docker, CI/CD (GitHub Actions, Fastlane, CircleCI), Nx Monorepo, Git

AI ENGINEERING

Claude Code, LLM API integration, Prompt engineering, Sub-agent orchestration, Agentic workflows

OBSERVABILITY & PERFORMANCE

Datadog, Structured logging, Debugging multi-tier systems

QUALITY

TDD, Cucumber BDD, Playwright, Unit + Integration + E2E testing

LEADERSHIP

Mentorship, ADRs, Cross-functional squads, Technical direction, Code reviews

LANGUAGES

PORTUGUESE

Native

ENGLISH

C1/C2

EDUCATION

Anhanguera

BACHELOR OF TECHNOLOGY (B.TECH.) IN INFORMATION TECHNOLOGY ·
JAN 2016 — JUL 2018
